Portfolio: <https://jithinkris.github.io/JithinKrishnan/>

Professional Summary

AI & Full Stack Developer with hands-on experience in building scalable Django-based web applications and implementing Machine Learning solutions. Strong foundations in Data Structures, REST APIs, and backend system design. Passionate about solving real-world problems using AI, automation, and data-driven approaches.

Education

Yenepoya University

M.Sc. Computer Science (AI & ML, Minor in Data Science)

Bengaluru, India

2024–2026

Naipunya School of Management

B.Sc. Computer Science, CGPA: 8.018

Kerala, India

2020–2023

Publication

2025: “Multi-Dimensional Predictive Modeling Framework for Educational Performance: A Cross-Cultural Analysis” – Published in WEFER.

Achievements

2026: Winner – AI in Healthcare Hackathon, Yenepoya University, Mangalore. Developed an AI-based Physiotherapy Assistant using MediaPipe for real-time human pose detection and exercise monitoring. The system analyzes body posture, tracks joint movements, and provides feedback to ensure correct physiotherapy exercises.

Academic Projects

2026: Qurify – Smart Checkout System

Technologies: Python, Django, Django REST Framework, SQLite, Flutter, Dart

- Developed REST APIs for billing, inventory, and product management.
- Implemented authentication and role-based access control.
- Optimized Django ORM queries for improved API performance.
- Designed inventory, sales, and transaction management modules.

2025: EduTimily – University Timetable Automation System

Technologies: Python, Django, SQLite

Role: Full Stack Development, Database Design, Deployment

GitHub: <https://github.com/jithinkris/EduTimily>

Automated university timetable generation, reduced scheduling conflicts, and simplified timetable management across departments.

2023: BusEase – AI-Based Bus Booking with Facial Recognition

Technologies: Python, Django, OpenCV, SQLite

GitHub: <https://github.com/jithinkris/BUS-BOOKING-SYSTEM>

Developed a bus booking system integrated with facial recognition for secure passenger authentication.

2022: WeCare – Hospital Management System

Technologies: Python, Django, SQLite

Built modules for patient registration, appointments, doctor management, and billing.

Freelance Projects

2026: WebCanteen – College Canteen Automation System

Technologies: Python, Django, QR Code, SQLite

GitHub: <https://github.com/jithinkris/WebCanteen>

Implemented QR-based food ordering, billing, and order verification to automate canteen operations.

2025: CleanUp – Garbage Collection Management System

Technologies: Python, Django, REST API, SQLite

Developed Admin, Collector, and Citizen modules with complaint management and real-time tracking.

2025: WebCharity – Charity and Donation Management Platform

Technologies: Python, Django, Bootstrap, SQLite

Designed a donation platform supporting campaign management, donor registration, and reporting.

2025: Turf Playground Booking System

Technologies: Python, Django, SQLite

Developed an online playground booking platform with scheduling, booking management, and admin controls.

2024: SmartInventory – Inventory Management System

Technologies: Python, Django, SQLite

Implemented inventory tracking, stock monitoring, automated alerts, and reporting.

2024: IoT-Based Electricity Monitoring System

Technologies: Python, IoT, Sensors

Developed an IoT application for monitoring electricity usage and generating analytics dashboards.

2024: SmartDoor – Face Recognition Access System

Technologies: Python, OpenCV

Implemented facial recognition-based authentication for secure automated door access.

Technical Skills

Programming Languages: Python, Dart, JavaScript, SQL

Mobile Development: Flutter

Backend Frameworks: Django, Django REST Framework

Web Technologies: HTML5, CSS3, Bootstrap

Machine Learning: Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV

Data Science: Pandas, NumPy, Matplotlib

Databases: SQLite, MySQL, Microsoft SQL Server

API Development: REST API Development, JSON

Tools: Git, GitHub, Postman, VS Code

Deployment: Render, PythonAnywhere

Cloud: Microsoft Azure Fundamentals (AZ-900), AWS Basics

Core Computer Science: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications

Microsoft: Microsoft Azure Fundamentals (AZ-900)

IBM: Machine Learning with Python

IBM: Deep Learning with PyTorch, Keras and TensorFlow

DeepLearning.AI: PyTorch for Deep Learning

Leadership

Led academic project teams ensuring timely delivery and quality standards.

Conducted programming workshops for undergraduate students.

Mentored juniors in AI and Full Stack development.
